### megol grease SF 2

megol grease SF 2 is a lithium calcium grease, made using carefully selected raw materials and special additives. It is designed for lubricating normal to highly stressed roller and plain bearings with normal to high speeds, even in dusty and moist operating conditions. To improve its compression capacity and the emergency properties, the grease also contains molybdenum sulphide. As a result of its excellent composition and properties, it is ideal for use in automatic grease dispensers.

Suitable for use in temperatures from -30 °C to +120 °C

Identification pursuant to DIN 51502: KPF2K -30
